

# INBRACE BY DR. MOGAVERO

BY VERONICA BADZEY

For 28 years, Dr. Frank Mogavero has been creating big, beautiful smiles for kids, teens, and adults throughout Southern California and beyond. He and his talented team are known for compassionate orthodontic care and exceptional results that are delivered in a cool, fun-loving environment. Through the utilization of clear and metal braces, Invisalign, early treatment, and surgical and airway orthodontics, Dr. Mogavero customizes a treatment plan to meet the needs and goals of each patient, whether it's for preventative, restorative or cosmetic outcomes. Now, he is one of only a select group of orthodontists in the U.S. to offer an innovative technology that may transform the path to gorgeous teeth — INBRACE.

As one of approximately 100 orthodontists invited to offer the cutting-edge INBRACE system, Dr. Mogavero is uniquely positioned to provide this remarkable new technology that straightens teeth far more

efficiently and quickly than traditional braces. "I think this is the most significant advancement in many years," says Dr. Mogavero, "I am proud to be one of only a handful of orthodontists across the country to be able to treat with INBRACE before it is released nationally next year."

INBRACE was originally developed by a dedicated team of Orthodontists, Engineers, Biologists, Computer Scientists and Advanced Manufacturing Experts at USC's Ostrow School of Dentistry. This revolutionary system works through the use of friction-free Smartwires made of flexible interdental loops that are designed to fit behind teeth, instead of in front of them. Unlike metal braces and Invisalign (which uses aligners and fasteners that can still be seen on the front of teeth), this makes INBRACE truly invisible.

"The Smartwires move teeth more efficiently with light continuous forces," relates Dr. Mogavero, "which is the best way to move teeth. All of the activations are built into the loops of the Smartwire, which starts working immediately." This translates into less dental visits for patients, more accurate results, and faster treatment times. Patients can also floss and brush normally while wearing INBRACE, due to the ingenious Smartwire design. INBRACE is also more hygienic than removable clear aligners, which tend to trap food and liquids, and can become stained and discolored over time.

The most exciting feature of INBRACE is that no one will even know you're wearing them. Dr. Mogavero's INBRACE patient, Figen Padley says, "I absolutely love my INBRACE. I've had them on for two months and the changes have been significant. The braces aren't visible, and my smile looks great."

It's easy to get started with INBRACE. The procedure begins with a simple set of orthodontic X-rays, digital photos, and scans of a patient's teeth. The data is then uploaded directly to the INBRACE team through its secure online portal. A single visit is usually all that's needed to attach the new, custom-designed braces, and patients will be happy to know that INBRACE is typically covered by orthodontic dental insurance.

Dr. Mogavero is a Board Certified Orthodontist (Baylor Orthodontics) with degrees in Biomedical Engineering and Dentistry from UCLA and he has taught Orthodontics for five years at USC. His practice includes locations in San Clemente, San Diego, and Mammoth Lakes. Give him a call today to schedule an appointment or visit [SyncYourSmile.com](http://SyncYourSmile.com).

"At first I was really skeptical about trying a new technology with INBRACE. My friends have already noticed my straighter smile, and it's only been about a month! I can definitely tell it's working."  
— Tannor Morgan

"I'm really excited to have my teeth straightened. The INBRACE was such a quick and easy process with Dr. Mogavero."  
— Nicki Bright

"I am thankful for INBRACE because I am straightening my teeth — and nobody knows it but me! My tooth movement has been quick - a lot quicker than expected — and my friends are already noticing how straight my smile is getting! Thank you to Dr. Mogavero and the Team at INBRACE!"  
— Lindsay Russo with son Mason
